

Z·Line

Z·Line, a versatile power line system that aims to offer a safe and convenient plug-and-play system for your power needs.

Suitable for both home and office, Z·Line combines the elements of esthetical design, premium quality and competitive pricing to create an ultimate consumer experience.

Available in multiple lengths and colours, Z·Line provides a solution to do away with costly, cumbersome and messy hole drilling process of installing conventional sockets. This offers maximum flexibility in deciding where, when and number of sockets you need, not only at the time of installation, but allowing you to add in more sockets anytime, anywhere.

zenso

APPLICATIONS

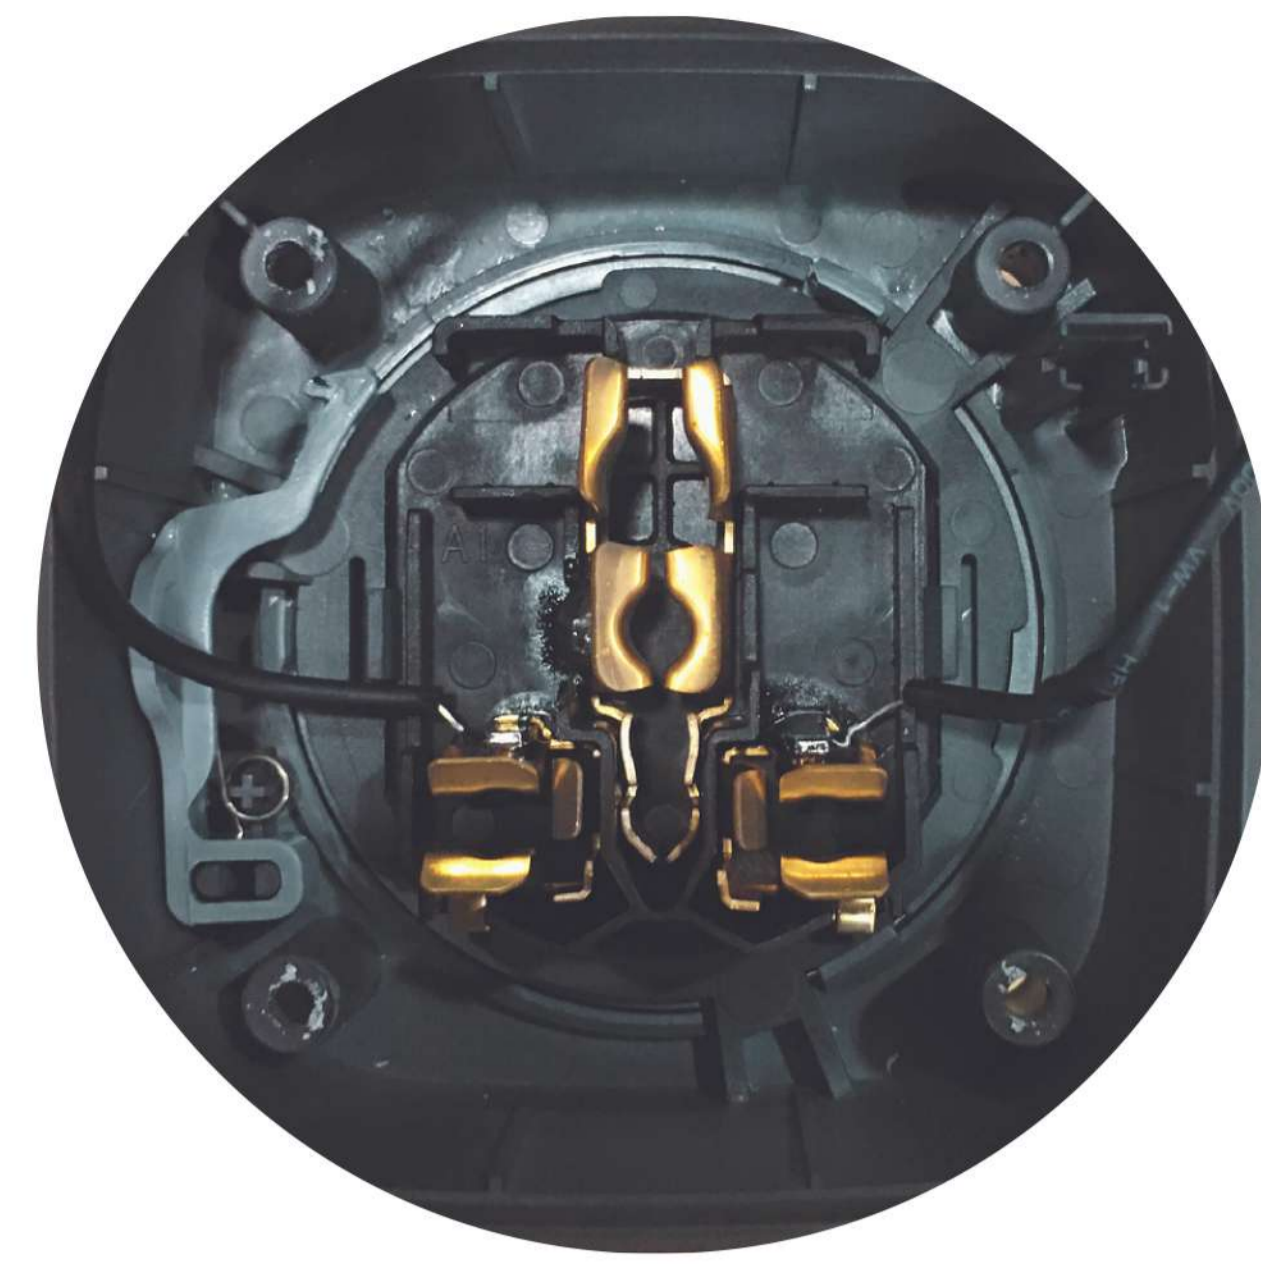

Z-Line 13A sockets has been tested according to the relevant standards and successfully acquired Sirim certification.

Two sided terminal at the left and right side of the track to provide flexibility in installation.

Our sockets are made of finest copper materials to enhance conductivity and increase durability.

Live and neutral positioned on top of the track to avoid contact with water splash.

Earth/ Ground wiring in all tracks to maximise safety protection.

Power line body made from Aluminium Alloy - light, strong and corrosion resistance.
