Doors and Windows

Live Beautifully. Uncompromising Quality.

Our Medium - Aluminium

Aluminium is our canvas and your home will be our masterpiece. We combine the versatility of aluminium with ground breaking engineering to deliver products that are functional, aesthetic pleasing, durable, long lasting and low maintenance.

Aluminium is resistant to heat, chemicals and weathering under harsh environmental conditions, making it the perfect building block for your home. It also eliminates concerns regarding wear and tear, corrosion, pests and termites.

WEATHER RESISTANT

MOISTURE RESISTANT

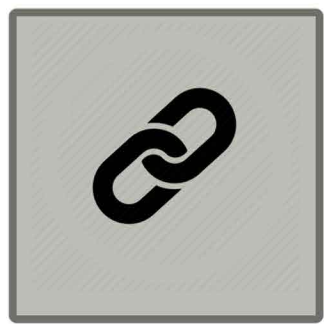

HEAT RESISTANT

HIGH STRENGTH AND INTEGRITY

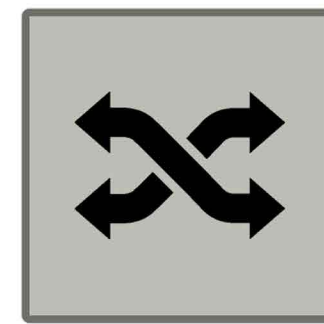

RUST AND CORROSION PROOF

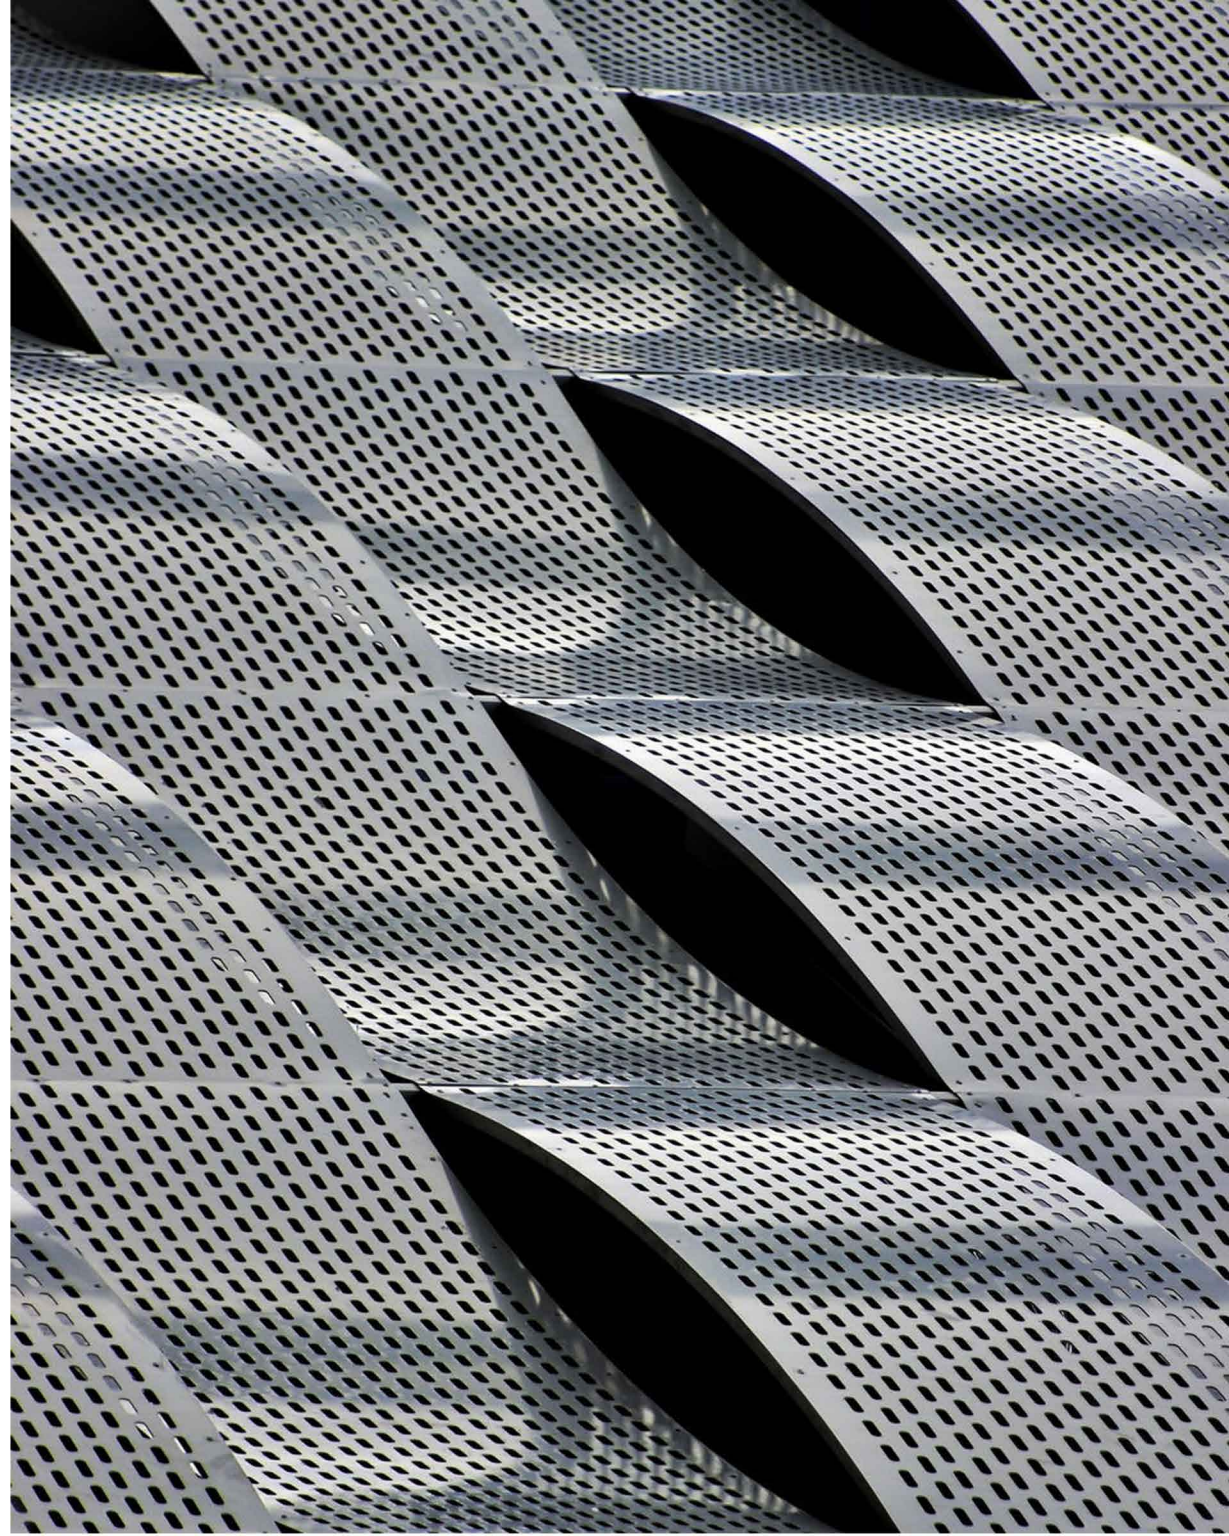

DURABLE

LOW MAINTAINANCE

HIGH VERSATILITY IN APPLICATION

Sliding Doors

Maximum size

10 feet height, 5 feet width per panel

Colours

White, Black, Grey

Glass

Laminated, Tempered and Normal Glass

Laminated Glass

Safety glass, two layers of glass bonded by a inner glue together. Explosion-proof and sound-proof.

Tempered Glass

Safety glass with improved resistance to pressure via a thermal tempering process, fractures into tiny and harmless fragments when broken. Impact strength of tempered glass is 3 to 5 times stronger than normal glass.

Heavy Duty Rollers

Robust extruded aluminum track and stainless steel rollers ensure smooth operation at all times.

Integrated Casting

An integrated casting system is used in the design and construction of our sliding doors. This reduces the number of joints in the frame which improves durability and structural stiffness, providing additional strength and support.

Folding Doors

Maximum size

12 feet height, 3 feet width per panel

Colours

White, Black, Grey

Glass

Laminated, Tempered and Normal Glass

Laminated Glass

Safety glass, two layers of glass bonded by a inner glue together. Explosion-proof and sound-proof.

Tempered Glass

Safety glass with improved resistance to pressure via a thermal tempering process, fractures into tiny and harmless fragments when broken. Impact strength of tempered glass is 3 to 5 times stronger than normal glass.

Concealed Hinges

High quality concealed hinges improve aesthetics while providing smooth operation. It also delivers excellent strength, durability, and support for continuous and long-term use.

Multipoint Lock System

A multipoint lock system ensures better security and provides multiple protection for you and your loved ones.

Stainless-steel Security Netting

Maximum size

12 feet height, 3 feet width per panel

Colours

White, Black, Grey

Concealed Hinges

A multipoint lock system ensures better security and provides multiple protection for you and your loved ones.

Aluminium Grills

Colours

White, Black, Grey

Form and Function

The unique design of our aluminum grills is pleasing to the eyes and it offers maximum protection for your home and valuables with virtually no maintenance needed.

High Performance Windows

Profiles

V+, H, M, P and Fixed Window Panels (Shopfront)

Maximum size

12 feet height, 3 feet width per panel

Colours

White, Black, Grey

Glass

Laminated, Tempered and Normal Glass

Soundproof

Our windows are designed and engineered to reduce external noise levels to make your home a comfortable silent sanctuary.

Anti Leak

Equipped with a double protection layer system that protects your home from unwanted water intrusion and moisture damage.

Structural Integrity

Superior build quality and materials ensure protection from high speed winds and other external forces.

Pergolas

The Right Materials

Heavy duty aluminum beams and high transparency glass roofing translates to a strong and durable structure while still allowing you to enjoy outward visibility.

Colours

Black, Grey and White

Louvers

Profiles

Eclipse and Z Profile

100% Aluminium

Aluminum is resistant to heat, chemicals and weathering under harsh environmental conditions, making it the perfect material for the construction of your louvers. It eliminates all concerns regarding wear and tear, corrosion and termites that are associated with wooden louvers.
